PROJECTS

BLOG APP

Built a responsive and dynamic blog app using React.js that allows users to read, create, edit, and delete blog posts. The app features component-based architecture, state management using hooks. Integrated a clean and modern UI for a smooth user experience.

Features:

- Add, edit, and delete blog posts
- Dynamic routing with React Router
- Responsive UI design
- State management using React hooks

FOOD DELIVERY APP (FRONTEND)

Developed a sleek and responsive food delivery web application using React.js, Tailwind CSS, and Redux for state management. The app allows users to browse food items by category, add items to cart, and manage cart operations efficiently.

Key Features:

- Browse food items by categories
- Add/remove items from cart
- Global state management with Redux
